

Topic : Online Voting System for Award Nominations

Group no : 10

Campus : Malabe

Submission Date: 2022/ 05/ 20

We declare that this is our own work and this Assignment does not incorporate without acknowledgment any material previously submitted by anyone else in SLIIT or any other university/Institute. And we declare that each one of us equally contributed to the completion of this Assignment.

Registration No	Name	Contact Number
IT21307294	D.G.A.S. Gamage	070 2456332
IT21312076	E.G.S.S. Gunasinghe	075 5697095
IT21309274	K.V.A.M. Ramsith	071 3740633

IT21308352	D.H.R.A. Jayathilaka	070 1804296

(1) Requirements Analysis

The “Gold Star” website provides an online voting system for award nominations. In order to vote for a nominee first users must register into the system by entering the required details. To register into the system users must provide their first name, last name, email address, phone number, role, DOB, age, gender and password, then the system will automatically generate a user ID for each registering user. Then a registered user can vote for a desired nominee. A registered user can log in to the system by giving email address and password. Users can create an account, modify or delete information within the created account

Registered users can vote for a nominee by selecting the desired nominee, nominated under each award and cast their vote by clicking the vote now button, then the system will display a successful message. Visitors can view the latest results with live updates. Users can search the content and Users can give feedbacks also Users can report an issue. If user expect to change their vote, website facilitates to cancel the vote and cast their vote for another nominee before the deadline. Anyone can provide their feedback regarding the website. User can view the home page which provides the Top 3 voted songs, latest results and voting deadline count down. Nominees’ page provides all the nominated artists. Songs page provides all the nominated songs and also users can see the previous winners from the winner’s page.

Administrator should provide admin ID and password to log into the system. Administrator can modify, create and delete nominees. Administrator can accept valid voters and remove invalid voters. Administrator can create new awards, edit current awards and remove unnecessary awards. Administrator can manage feedbacks and ratings. Administrator can generate reports and publish reports. Administrator can upload content.
